| Services | System integration Product development and deployment partnerships 24/7 support and maintenance at industry level SLAs Telecom specialist consultancy |
| Products | Telecom Orchestration Platform TOP Testing Suite TOP Middleware |

Areas of expertise

BSS Integration
Convergent Billing
Real time Rating and Charging
Messaging (MMS, SMS, USSD)
Service Delivery Platform
VAS Acceleration
Policy Management
IN (SCP and IN Protocols)
Next Generation Services
Service node development
Quality assurance services
Integration with GSM network elements (MSC, HLR, VLR, GGSN etc)

Technologies

Real-time, Carrier-grade
High availability, highly scalable
SS7 stack, MAP, INAP, CAP, ISUP
SIP Diameter Parlay, GTP proprietary protocols
SOA, XML, CORBA, SOAP, J2EE, JAIN SLEE, JMX
Solaris, Linux, HP-UX

Sample projects

Convergent Charging Solution for MVNO
CAMEL service control point
Legacy prepaid to 3GPP
Real-time rating engine
Service delivery platform
Diameter session control
MAP gateway
OSA/Parlay charging gateway
SMS offload server
Mobile payment platform
Credit transfer service
Location based services
Prepaid customer loyalty/bonus
SIM lifecycle management
Performance analysis -data charging product
Pre-sales audit - convergence product
Services System integration
Outsourced product development
Product maintenance to end-of-life
Specialist consultancy
